

Actiphyte[®] of Roman Chamomile

Actiphyte[®] of Roman Chamomile

CTFA/INCI NAME: Anthemis Nobilis Flower Extract

LATIN NAME: *Anthemis nobilis*

CAS NUMBER: 84649-86-5 EINECS NUMBER: 283-467-5

PART USED: Flowers and Herb

OTHER COMMON NAMES: Common Chamomile, Garden Chamomile, Low Chamomile, Whig Plant, And English Chamomile

HISTORIC USES:

The Egyptians revered this plant for its virtues. Because of their belief in its power to cure ague, they dedicated it to their gods. It has been used in eyewashes as well as for swellings, bruises, toothaches, earaches, and local and intestinal inflammations because of its calmative properties. It has also been used to treat indigestion, insomnia, and skin problems. It is also considered a preventative and the sole certain remedy for nightmares. Its antiseptic qualities have been used to heal open sores, wounds, and abrasions.

SUGGESTED COSMETIC USES:

Actiphyte[®] of Roman Chamomile can be used in creams; lotions, moisturizers, toners, and bath care products. It can also be used in shampoos, conditioners, and hair-coloring formulas to add highlights to blonde hair.
